

# DREAM

## PROGRAM

*4 Pre-K Students*

**SCIENCE** • **TECHNOLOGY** • **ENGINEERING** • **ART** • **MATH**

DREAM is EXCITED to announce that we will be opening a STEAM Classroom this Fall!

STEAM explorations offer children the skills needed for lifelong learning. Pre-K children are effective STEM learners due to their innate sense of wonder and curiosity. Implementation of a STEAM environment will provide opportunities for children to explore these subjects in an integrated way every day through books, discussions, experiments, art projects, educational games and more. This method is far more effective than limiting instruction of STEAM subjects or any subject to only certain times of the day or week.

The DREAM STEAM environment will offer children opportunities to learn how to observe, ask questions, investigate, and use problem-solving skills that lead to innovative thinking. Students ages 4-5 will receive the opportunity to help us pilot the first STEAM Pre-Kindergarten Class in our community. This state-of-the-art classrooms will be equipped with all of the latest and most relevant STEAM equipment and learning materials to provide your child with the most meaning and educational experience EVER!

Although the STEAM classroom will be our new addition to DREAM this school year, our existing classrooms will also be UPGRADED! We are adding technology centers in all classrooms in addition to a new curriculum that will offer more diverse learning opportunities.

We are excited about the upcoming school year and appreciate you making the choice to allow the DREAM Team the opportunity to provide quality academic and enrichment services to your family.
